Wheel Nut Hardware Cautions:

Vehicle wheel nut hardware should always be inspected for wear and damage and replaced if necessary. Always ensure wheel mating surfaces are clean and wheel nuts are torqued to manufacturer's specifications to ensure optimal wheel clamping force.

To ensure the correct wheel nut hardware is installed on O.E.M. wheels, the most current FMSI Wheel Nut & Caps Application Guide should be utilized. FMSI does not accept any liability for errors in applications as result of incorrect part number selection, cross referencing or a "make fit" type fitment. Installing FMSI hardware based on cross referencing or "guessing" is done solely at the installer's risk

Care must be taken when installing new wheel nuts on original equipment or aftermarket (winter steel rims) to insure the correct style wheel nut is used. Please review the various styles of wheel nuts shown below to understand how they seat with the rim and why using the incorrect wheel nut can result in serious damage to car and owner.

Checklist

1. Determine correct thread size of replacement wheel nut (12mm x 1.50, ½-20 etc.)
2. Determine that the replacement wheel nut has the same outside socket (wrench) size as the original wheel nut and is no shorter in the overall length.
3. Determine the seat style (where the wheel nut meets the rim) and insure the wheel nut you will be installing is the correct style for the rim, this can change when winter steel rims are installed on vehicles.

3801
Solid steel, zinc OE chrome plated
commonly used on steel rims (winter)
(with 60°connical seat)

3892
Modified Acorn (tapered Meg seal) with
extended threads. Solid steel chrome plating
(with 60°connical seat)

3837
Retainer wheel nut. With a ridge or ring to
hold a hub cap or a trim plate in place.
Solid steel chrome plating
(with 60°connical seat)

6146
Mag Wheel Nut
Solid Steel Chrome plating. Comes in short & long
shunk & standard hex & long hex

3846
Open end external thread wheel nut.
accepts plastic cap
(with 60°connical seat)

6117
Retainer wheel nut. With a ridge or ring to
hold a hub cap or a trim plate in place.
Solid steel chrome plating
(with radius/ball seat)

3841
Solid steel, chrome plated short acorn style
Confirm length before replacing
(with 60°connical seat)

3856
Flanged flat wheel nut
(with flat seat)

3878
Chrome bulge nut
(with rounded ball seat)

3843
Open end solid steel bulge nut
(with 60°connical seat)

6102
Flanged flat solid steel wheel nut
Chrome plating

3879
Acorn Bulge solid steel chrome
/ Zinc plated wheel nut
Confirm length before replacing
(with radius/ball seat)

3875
Chrome Acorn nut
(with rounded ball seat)

3805
Acorn Bulge solid steel chrome
/ Zinc plated wheel nut
Confirm length before replacing
(with 60°connical seat)

3868
Ford Acorn Bulge solid steel chrome
plated wheel nut
Confirm length before replacing
(with 60°connical seat)

***Note:** Installers are required to determine correct thread size, outside wrench diameter, overall length and seat style (where lug nut meets rim)*

Wheel Nut Assortments

Great coverage for all your needs!

PART NUMBER **0134**

100 PCS

100 Piece Assortment - contains 6 of the most popular chrome acorn & external thread wheel nuts

PART NUMBER **0483**

48 PCS

48 Piece Assortment - contains 5 of the most popular chrome acron & external thread wheel nuts

PART NUMBER **0171**

320 PCS

320 Piece Wheel Nut Assortment - 24 part numbers with coverage for many popular vehicles

PART NUMBER **0172**

910 PCS

Over 75% Coverage

40 Hole Bin Included

910 Piece Wheel Nut Assortment over 75% coverage

PART NUMBER **0173**

over **1100 PCS**

Coverage for:
General Motors, Ford, Chrysler, Toyota, Lexus, Honda, Acura, Mazda, Nissan, Infiniti, Subaru, Scion, Mitsubishi, Kia, Hyundai

Over 80% Coverage

72 Hole Bin Included

FMSI's most comprehensive Wheel Nut Assortment. Over 1100 pieces with coverage for standard, solid steel, chrome acorn, stainless steel, ball seat, external thread, bulge, domed & flat face.

SOCKET SETS & CHROME ACORN WHEEL NUTS ASSORTMENT

CR-MO CHROMIUM MOLYBDENUM HEAT HARDENED ALLOY STEEL, STRONGER THAN CARBON STEEL, STAINLESS STEEL AND VERY RESISTANT TO RUST
